November 2, 2020

Dear Grove Children's Preschool/Indian Trail Staff and Families:

District 58 determined this morning that a Grove Children's Preschool student at Indian Trail School tested positive for COVID-19. The student has not been at school since Friday, Oct. 30. The family learned that a close contact of the student tested positive. Therefore, the family had their child tested. The student is asymptomatic, but did test positive. Per Illinois Department of Public Health (IDPH) guidelines, anyone who tests positive and is asymptomatic must quarantine for a minimum of 10 days after his/her specimen collection date. There is no known school-based link related to this case.

At this time, we do not believe the student was in close contact with any District 58 students or staff members while at school due to maintaining the District's strict social distancing requirements. In the event the District learns that there were close contacts with other students or staff inside or outside of school, those individuals will be required to quarantine for 14 days. We also do not believe this case is related to today's positive Indian Trail staff case.

District 58 will continue to follow all protocols outlined by the IDPH when a student or staff member tests positive, including contact tracing. Additionally, the District thoroughly cleans and disinfects all areas of schools and/or buildings every night.

District 58 will also notify the DuPage County Health Department (DCHD) of the positive case to ensure that protocols, contact tracing and the self-certification process were followed. The health and safety of our students, staff and families is paramount and we will continue to follow all guidelines called for by the IDPH and the DCHD. Please continue to wear masks, adhere to social distancing requirements, and thoroughly wash and/or sanitize your hands as this is the best way to combat the spread of COVID-19.

Sincerely,

Dr. Kevin B. Russell
Superintendent of Schools
